

MFA device

Device options

In addition to username and password, you will use this device to authenticate into your account.

Passkey or security key

Authenticate using your fingerprint, face, or screen lock.
Create a passkey on this device or use another device, like a FIDO2 security key.

Authenticator app

Authenticate using a code generated by an app installed on your mobile device or computer.

Hardware TOTP token

Authenticate using a code generated by Hardware TOTP token or other hardware devices.

Next

1

Install a compatible application such as Google Authenticator, Duo Mobile, or Authy app on your mobile device or computer.

[See a list of compatible applications](#) 

2

Open your authenticator app, choose **Show QR code** on this page, then use the app to scan the code. Alternatively, you can type a secret key.

[Show secret key](#)

3

Type two consecutive MFA codes below

Enter a code from your virtual app below

Wait 30 seconds, and enter a second code entry.

Add MFA

✔ MFA device assigned

You can register up to 8 MFA devices of any combination of the currently supported MFA types with your AWS account root and IAM user. With multiple MFA devices, you only need one MFA device to sign in to the AWS console or create a session through the AWS CLI with that user.
